

## Top Online Tools

1. **Vizzlie!** I use this program for all of my post scheduling. You can write one party template and reuse it over and over by simply swapping out key words. It also allows you to create text and e-mail campaigns. **Referral Code: 3AHXNQH** I also offer you the ability to purchase templates for me or build you a custom one. **Ask me for pricing.**
2. **Canva.** Canva PRO is by far my favourite graphic editing program. You can easily customize graphics and also schedule directly to Facebook.
3. **Google Products.** I use Google Suite products for pretty much my whole business. Looking for guidance on how to create kick-butt systems that you can use over and over? **Book a zoom call with me.**
4. **VivaVideo.** This is my preferred video editor app on my phone. I love the simplicity of it and the ability to cut portions out of your video recordings.
